PROFESSIONAL SUMMARY

Full-stack developer with 6+ years of experience building and shipping production web and mobile products. Works across React, Next.js, and Node.js on the backend, React Native (Expo) and REST API integrations on the front end, and custom WordPress or Shopify builds when that is the right tool for the client. Delivered 150+ projects for clients worldwide, from full rebuilds of slow, unreliable sites to new products built from scratch. Comfortable owning a project end to end — client scoping, development, third-party API integration, and post-launch support.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, React Native (Expo), PHP

Web & CMS: WordPress (Custom Themes & Plugins), WooCommerce, Shopify (Liquid), Elementor, ACF, WP-Bakery

Tools & Platforms: Tailwind CSS, HTML5, CSS3, REST APIs, AJAX, Git, GitHub, AWS, SQL / MySQL, Responsive Design

Practices: Version control workflows, project management (Jira), client communication, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Bannpeople 2025 – Present

Web Developer

- Build and maintain custom web solutions for a portfolio of active clients, from first line of code to production support.
- Ship custom WordPress builds tailored to each client's workflow.
- Deliver fully responsive, mobile-first layouts across every project.
- Wire up third-party APIs and payment gateways end to end.
- Cut page load times through targeted performance passes.

Teqexpert 2024 – 2025

Web Developer

- Led full-stack builds — custom WordPress themes alongside React and Next.js applications — from spec to launch.
- Built 15+ custom WordPress themes and plugins from scratch.

- Shipped production React and Next.js applications.
- Introduced modern JavaScript patterns that the team adopted project-wide.
- Partnered with design and product management across cross-functional delivery.

TZS 2023 – 2024

Web Developer

- Developed and maintained responsive client websites, owning both the frontend experience and the PHP backend behind it.
- Integrated third-party APIs to extend core site functionality.
- Ran the team's Git workflow and Jira sprint tracking.
- Tuned performance and UX across the site catalog.
- Maintained and extended PHP backend systems.

Unyscape Infocom 2021 – 2023

Web Developer

- Specialized in custom WordPress builds and SEO — the role that set the foundation for everything since.
- Grew organic traffic through hands-on SEO strategy.
- Redesigned key UX flows for responsiveness and clarity.
- Resolved production issues with near-zero downtime.
- Collaborated closely with teams to ship polished releases.
